

INSTRUCTIONS FOR DOWNLOADING MAPS AND VIEWER SOFTWARE

FOLLOW STEPS

- Step 01: Click on the Map Export download link. You will be prompted to either download and save file or open from its location. You must save it to your disk. Failure to do so could result in a corrupt install if your connection to the Internet is broken
- Step 02: Click on Arc Explore 9.x and Install Arc Explore 9.x.
- If you wish to download the software directly from ESRI or other Free Programs you can go to <http://www.esri.com/software/arcexplorer/download.html> or <http://www.esri.com/software/arcgis/explorer/index.html> where you can obtain other free software.
- Step 03: Create a folder called Shapes in your local Disk C:\Shapes
- Step 04: Once Map Export is saved to your hard drive double-click on it and select “Extract” and extract the files to C:\Shapes.
- Step 05: Once you have completed these actions go to your programs menu, click ArcGis, ArcExplorer 9.x and then click on ArcExplorer. **Hint:** it will open a blank untitled page
- Step 06: Select file and open project: Change the directory to C:\Shapes and double-click on ArcExplorer 9.x project must have an .axl extension.
- Step 07: Project name for ArcExplorer 9.x is Grayson Project.axl
- Step 08: You should be up and running now.
